

Dear Customer,

NJAW is performing work at our Water Treatment Plant located at 40 Imbrook Lane Aberdeen NJ. As a result we have adjusted pressures in the water main in the street in front of your house starting at 11 am today. You may see an increase in pressure at your home starting today through the end of April. Possibly you will experience pressure variations more frequently than over the past six months. Please feel free to contact the operator at our regional control center (732 933 5947) if you experience anything beyond a minor disruption/ increase in pressure.

Sincerely,

Paul T. McKeon
Production Manager
